

Undiluting Hayward's protected groups by thinking outside the lines

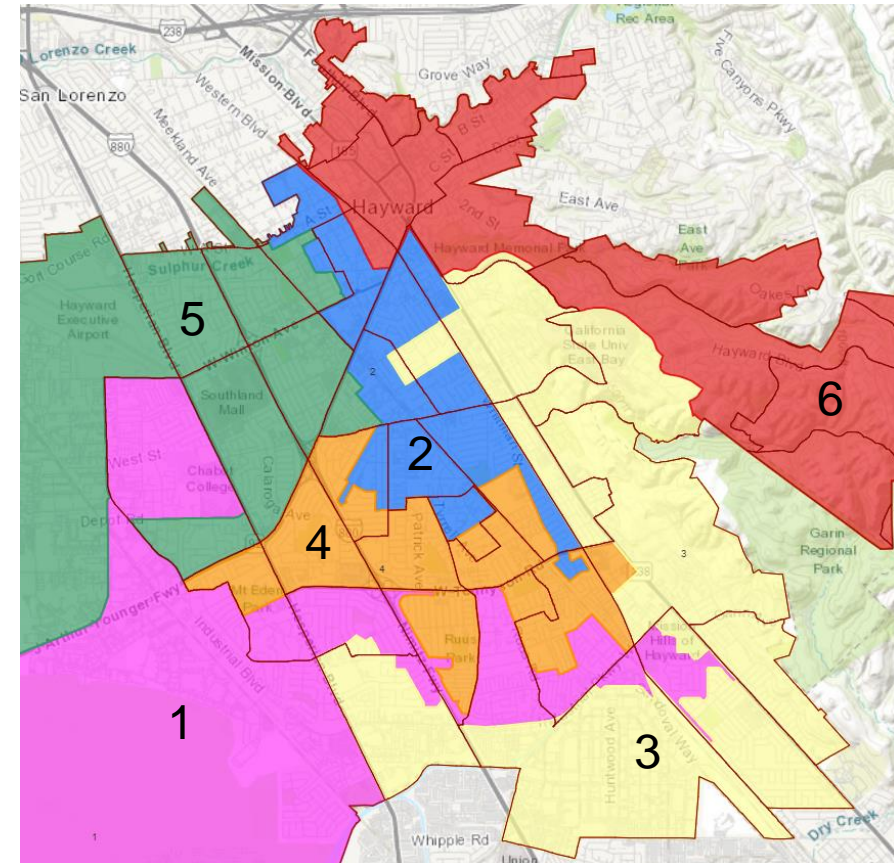

Dave Robinson

June 2024

Hayward's geography is uncooperative with our voting rights goals.

- The original goal of Hayward's switch to district elections is to empower Voting Rights Act protected groups to elect candidates of their choice.
- The first proposed solution is to make one-member districts where a protected group is a majority.
- In Hayward, this requires tortuous district boundaries connecting distant neighborhoods (as shown).
- Solving the problem requires thinking outside the district lines.

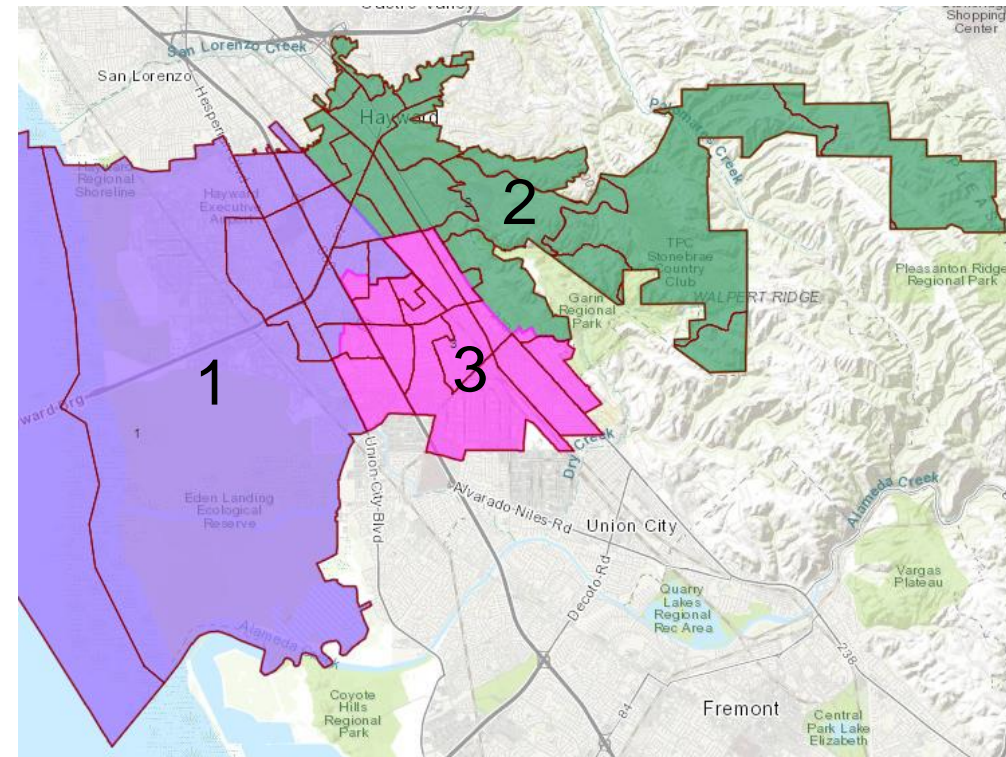

| District | Population (2020) | | Citizen Voting Age Population (2022) | | | | |
|-----------------------------|-------------------|---|--------------------------------------|---------|---------|-------|---------|
| | Population | Dev % | % Latino | % Black | % Asian | % MMR | % White |
| City | 163,172 | | 31.5% | 12.3% | 31.0% | 2.3% | 20.9% |
| 1 | 27,211 | 0.06% | 25.1% | 8.0% | 51.8% | 0.9% | 12.2% |
| 2 | 27,319 | 0.45% | 50.5% | 12.1% | 17.5% | 1.6% | 14.8% |
| 3 | 27,192 | -0.01% | 31.5% | 12.3% | 30.4% | 0.4% | 22.8% |
| 4 | 26,929 | -0.98% | 34.1% | 10.6% | 29.1% | 2.6% | 18.5% |
| 5 | 27,156 | -0.14% | 35.5% | 10.3% | 30.9% | 1.5% | 19.0% |
| 6 | 27,365 | 0.62% | 18.7% | 19.6% | 21.9% | 1.2% | 36.2% |
| Ideal Pop: | 27,195.33 | | | | | | |
| <i>Lowest District Dev</i> | -1.0% | https://maphayward.org/june-22-dave-robinson/ | | | | | |
| <i>Highest District Dev</i> | 0.6% | | | | | | |
| Total Plan Range | 1.60% | ~~~~ A plan range up to 10% is considered legally allowable. | | | | | |

Solution: Elect 2 each from 3 districts.

- 2-seat ranked choice voting elects candidates with at least 1/3 of countable votes.
 - This is slightly more votes than a majority of a single-member district.
 - Each candidate is elected by a separate group of voters.
- 4 candidates could be elected by protected groups instead of 2.
- This works because there is room for everyone to be represented by a council.
 - Makes it a contest between candidates, not voters.
- Fewer, shorter district lines minimize splitting of communities of interest.

| District | Total Population | | Citizen Voting Age Population | | | | | |
|-------------------------|------------------|---|-------------------------------|----------|---------|---------|-------|---------|
| | Population | Dev % | Total | % Latino | % Black | % Asian | % MMR | % White |
| City | 163,531 | | 102820 | 31.5% | 12.3% | 31.0% | 2.3% | 20.9% |
| 1 | 54,430 | -0.15% | 34103 | 34.7% | 9.2% | 35.6% | 1.4% | 15.6% |
| 2 | 54,738 | 0.42% | 33528 | 26.6% | 17.9% | 24.1% | 1.0% | 28.3% |
| 3 | 54,363 | -0.27% | 35189 | 33.5% | 9.5% | 33.6% | 1.6% | 18.4% |
| Ideal Pop: | 54,510 | | | | | | | |
| Lowest District Dev %: | -0.3% | https://maphayward.org/june-23-dave-robinson/ | | | | | | |
| Highest District Dev %: | 0.4% | | | | | | | |
| Total Plan Range | 0.69% | ~~~~ A plan range up to 10% is considered legally allowable. | | | | | | |

Albany's voting rights solution

- Our neighbors in Albany settled their voting rights case by allowing voters to group themselves without district lines.
- 5-seat city council with staggered terms and appointed mayor.
 - In Hayward, we would elect 2 districts in one election, then 1 district and mayor in another.
- They elected 2 on ranked-choice ballots in November 2022.

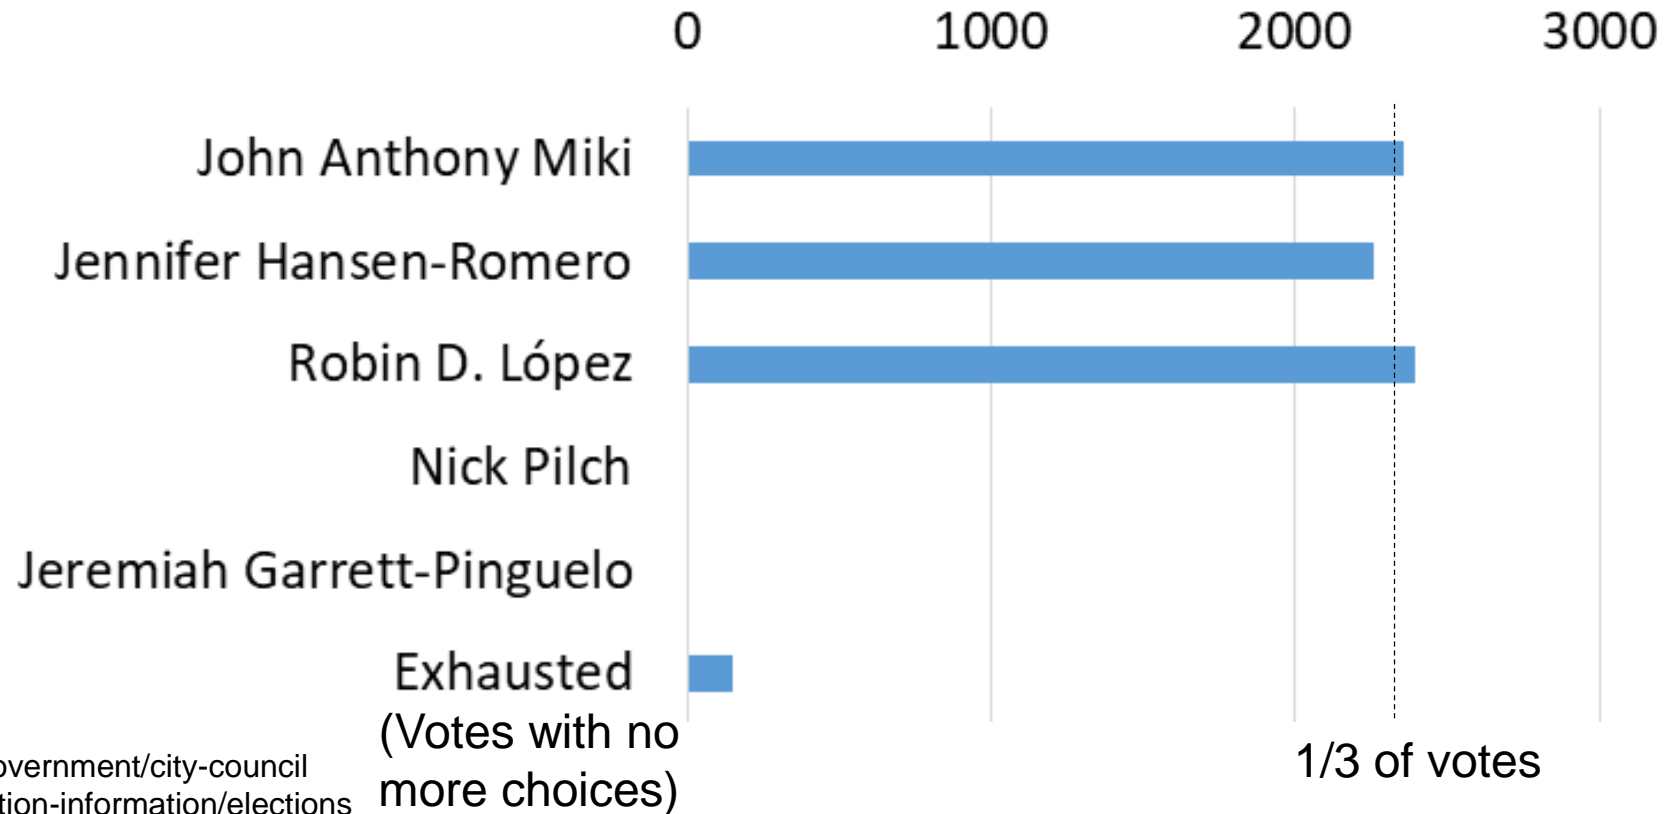

| Albany City Council | | | | | |
|------------------------------------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|-----------------------|
| Number of positions to elect is 2. | 1st choice | 2nd choice | 3rd choice | 4th choice | 5th choice |
| John Anthony Miki | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Jennifer Hansen-Romero | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Jeremiah Garrett-Pinguelo | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Nick Pilch | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> |
| Robin D. López | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Write-In: _____ | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

Albany is a compact city in northern Alameda County. Population 20,271
 Openstreetmaps.org

Result: Albany city council, Nov 2022

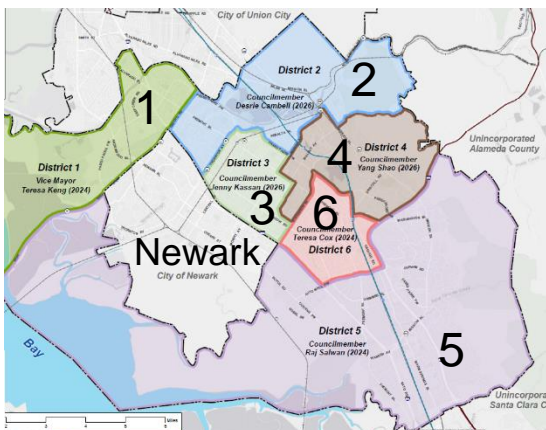

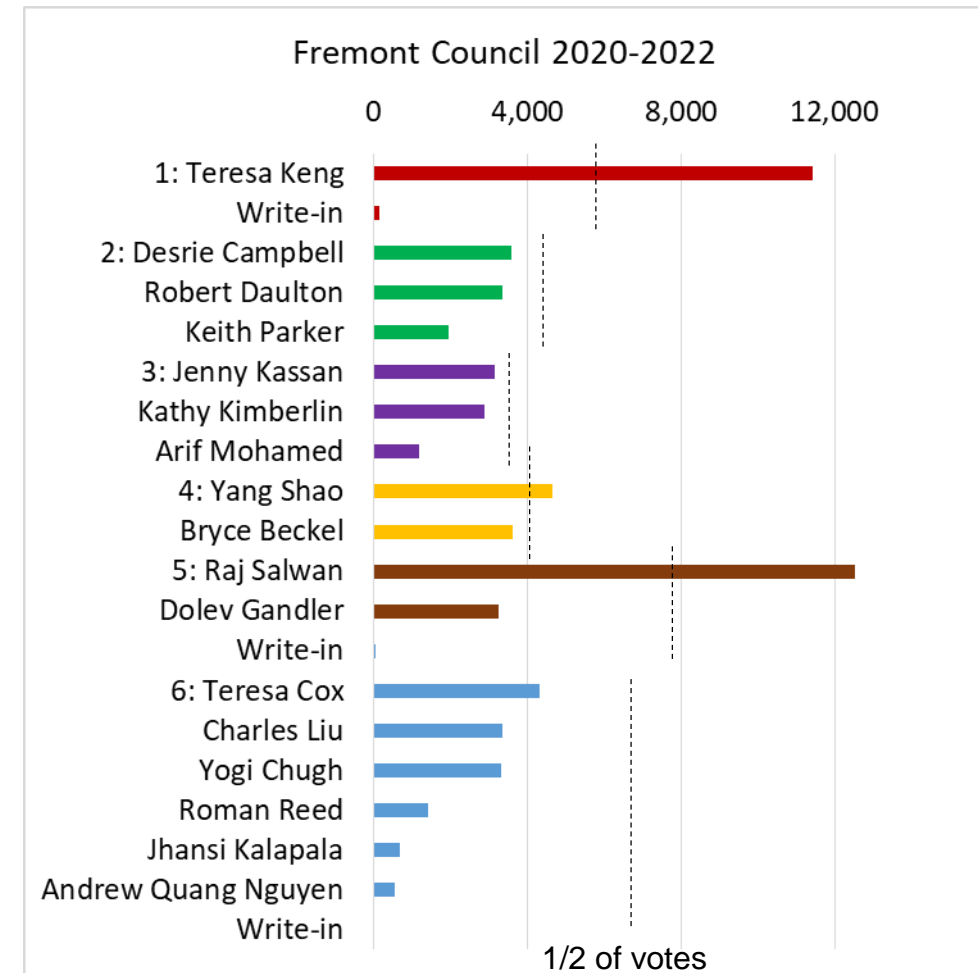

- Votes count for their highest available ranking.
- Last-place candidates are successively eliminated, and portions of extra votes for winners move to next choices.
- Many in the city are pleased by its voting rights progress.

Fremont's voting rights solution

- Our neighbors in Fremont settled their voting rights case regarding Latino voters with 6 districts and an at-large mayor in 2017.
- When voters have more choices, the elected council member often lacks a strong mandate.
- 4 of 7 on the council do not have majority support.
- Did Latino voters benefit from this change?

Hey, wait...

- Didn't city attorney Michael Lawson say ranked-choice voting is not an option for Hayward?
 - It would require amending the city's CVRA settlement, which he may find unpalatable.
 - Plaintiff's attorney Scott Rafferty said he is considering 3-district ranked-choice voting in CVRA settlements for San Francisco's school and city college boards. He may agree to the same in Hayward.
- Isn't ranked-choice voting too complicated?
 - Millions of voters worldwide have used it for decades.
 - Millions of ranked-choice votes have been cast in San Francisco, Oakland, Berkeley, San Leandro, and Albany.
 - Error rates do not come close to offsetting benefits.
 - Less complicated, subjective, and technocratic than district line drawing.

How can Black voters elect a councilmember?

- Black voters live throughout the city and don't all fit well into one of 6 districts.
- If we used 7-seat ranked-choice voting, electing all 7 every cycle, and let the council appoint the mayor, voters with 12.5% of all votes could elect a candidate of their choice. Pull in a few multiracial voters and it can be done.
- Latino and Asian voters could still elect 2, and White voters 1.
- This plan is a tougher sell than the others because the city negotiated to keep the elected mayor in the settlement and Mr. Rafferty prefers smaller districts.
- It is an option if the parties change their minds.
- 3 districts could be a good balance.

| District | Total Population | | Citizen Voting Age Population | | | | | |
|--------------------------------|------------------|---|-------------------------------|----------|---------|---------|-------|---------|
| | Population | Dev % | Total | % Latino | % Black | % Asian | % MMR | % White |
| City | 163,531 | | 137434 | 31.5% | 12.3% | 31.0% | 2.3% | 20.9% |
| 1 | 163,531 | 0.00% | 137434 | 31.5% | 12.3% | 31.0% | 2.3% | 20.9% |
| Ideal Pop: | 163,531 | | | | | | | |
| <i>Lowest District Dev %:</i> | 0.0% | | | | | | | |
| <i>Highest District Dev %:</i> | 0.0% | | | | | | | |
| Total Plan Range | 0.00% | <i><~~~~ A plan range up to 10% is considered legally allowable.</i> | | | | | | |

Do larger districts deter candidates from protected groups?

- Theory #1: Larger district areas increase campaign cost and effort.
- Theory #2: Competition drives campaign costs to what the market will bear for a council seat.
- Ranked-choice candidates only need to reach one seat's worth of voters.
- Real-world example from Pleasanton's transition from at-large to 4 districts:

| Expenditures by 2020 at-large candidates | | | Vote % |
|--|--------------|---------|--------|
| Balch | \$ 37,241.66 | Elected | 22.26% |
| Brown | \$ 21,530.86 | | 11.44% |
| Kiziloglu | \$ 14,109.31 | | 8.65% |
| Allen | \$ 12,699.02 | | 20.18% |
| Lee | \$ 11,936.34 | | 7.52% |
| Buna | \$ 6,104.00 | | 6.23% |
| Arkin | \$ 5,789.24 | Elected | 23.59% |

| Expenditures by 2022 district candidates | | | Vote % |
|--|--------------|------------|--------|
| Wallace | \$ 42,995.04 | D1 | 38.74% |
| Nibert | \$ 6,888.67 | D1 Elected | 61.26% |
| Yee | \$ 34,205.50 | D2 | 23.71% |
| Liu | \$ 17,619.31 | D2 | 33.34% |
| Testa | \$ 4,493.88 | D2 Elected | 42.94% |

<https://www.acvote.org/election-information/elections>

- No clear pattern – except 100% turnover of candidate list!

Appendix: Counting Albany's ranked-choice votes

Counting: Albany city council, Nov 2022

- Votes count for the highest valid choice.
- Last-place candidates are sequentially eliminated.

Counting: Albany city council, Nov 2022

- This process removes the tradeoff between having more candidates versus having a winner with a strong mandate (“vote-splitting” or “spoiler” effects).
- Ranked-choice voting can also remove this tradeoff for single-winner elections.

Counting: Albany city council, Nov 2022

- John Anthony Miki is elected.
- Next round: about 80% of each vote for Miki stays, 20% goes to next choice.

Counting: Albany city council, Nov 2022

- López gets more of Miki's surplus votes and earns a seat.
- Each winner has accountable support of a separate group of voters.

← Later appointed to fill a vacancy!

Ranked-choice voting: the big picture

- For a large enough council, **every voter** can be represented by someone who he or she accountably supports, from among ample choices.
- Then, a majority of the council has accountable support of a majority of voters.
- Ranked-choice voting gathers enough preference information to arrange this.
- There is no need to pit voters against each other so that some win and some lose.
- There is no room for systemic racism if we reach this goal.
- There is no need to engineer district lines to achieve a desired outcome.
- More people will vote if they can reliably obtain satisfactory representation from among meaningful options.
- RCV has decades of success in faraway lands like Australia; Ireland; Cambridge, MA; and now one success with multi-winner RCV in Alameda County.
